

## We're Agile Six

**Agile Six was founded on a belief in - and commitment to - building a better citizen-centered government.** We are founders of the Digital Services Coalition, a group of commercial digital services firms committed to building better tech for the government. Our commitment to civic tech is what brought Agile Six to this space. We are using this passion to deliver the next generation of digital service innovations to customers like the Centers for Medicaid and Medicare Services, Department of Veterans Affairs and the State of California.

We believe that strong teams are built on trust and agility. When someone tells you that they've "Got Your Six," it means they're watching your back. Knowing other team members have our six means we can focus on transforming the working relationship between government and the private sector – which we believe will deliver better digital experiences for our citizens.

## What we do

Agile Six is a full-spectrum digital services company that combines digital government modernization, software services delivery, and human-centered design. Built on a belief that **government software should be just as efficient and engaging as commercial products**, we have implemented agile digital services transformations on numerous contracts. Our digital services team offers proficiency across six core competency areas and delivers these capabilities with clinical, military, and federal domain expertise.

### Design

Building clean, fresh experiences that are intuitive, engaging, and smart.

### Development

Delivering powerful and scalable applications in diverse environments.

### DevOps & Cloud

Improving performance and scalability, with cloud-based environments that employ CI/CD best practices.

### Agile Coaching

Meeting people where they are in their agile journey, and empathetically taking them where we've been.

### Research

Research based on HCD, user empathy, survey-based and ethnographic need finding, usability testing, and more.

### Digital Transformation

Changing procurement, delivery, and leadership cultures to adopt agile best practices and streamline workflows throughout the entire ecosystem.

## How we work

**Our seasoned team of agile practitioners brings expertise across the entire acquisition and delivery lifecycle**, from budgets and procurement to research, design, and development. We work to uncover problems quickly and iterate even quicker, so we learn fast and live by incremental improvement. We are certified practitioners, trainers, and coaches in a number of Agile frameworks, such as Scrum, Kanban, and SAFe. More importantly, we truly understand the fundamental principles behind these frameworks. This enables us to tailor our agile approach based on an organization's or team's current level of know-how and adoption, ensuring Agile is successfully institutionalized at multiple levels of an organization.

## What we've done

Everyone has unique, complex needs, so we never take a "one size fits all" approach to transformation. Our team knows how to leverage our extensive experience across the federal government to bring the innovation your organization needs. Our past experience as a prime contractor includes the following projects:

- **CMS MPSM BPA.** Agile Six was awarded a Blanket Purchase Agreement (BPA) for the Medicare Payment System Modernization (MPSM), to transform and modernize the legacy Medicare payment systems that over fifty-seven millions Americans depend on for their healthcare.
- **VA.gov Modernization.** Agile Six is creating a new digital "front door" at VA.gov to improve the Veteran experience in support of the VA's Digital Modernization effort.
- **CMS EATS BPA.** Agile Six has been awarded numerous task orders under the Enterprise Agile Transformation Services (EATS) BPA, providing CMS programs and teams with coaching support to help further agile adoption and agency transformation effort.
- **California Pre-qualified Vendor Pool for Agile Delivery Services.** Agile Six was awarded a vendor position to provide California with human-centric designs and agile software development services.
- **VA Diffusion Marketplace.** Agile Six is helping the VA to spread clinical and administrative best practices across VHA by building an online innovation marketplace; saving Veterans' lives, improving outcomes, increasing patient satisfaction, and preserving taxpayer money.

## Certifications, Contract Vehicles and Industry Information
